

## TECHNICAL TEST

### Description

Make user-interactive insights to see the social media monthly evolution of the followers of our main platforms.

Develop a dashboard to visualize your results.

To take into consideration:

- We have 2 competitions: **EuroLeague** (League1 in the Excel) and **EuroCup** (League2). We should be able to observe the evolution of each competition separately.
- The date range is a total of two seasons (two years starting on July and finishing in June).

You can use Tableau (recommended) or PowerBI.

Test duration: 1 hour + 10 minutes of presentation. The results will be presented in English.
